Information on Safety & Health in Your Workplace

NOVEMBER 2006 QUICK UPDATE

LAST MINUTE COURSE OFFERINGS

OSHA 10 Hour Class for Construction. (December 4 & 6, 2006) If you are new to the safety and health field, if you want to brush up on the OSHA rules, or if you are responsible as a manager or supervisor to assure safety on a job site, this course is a MUST. The course will be held at Associated Builders & Contractors (ABC) in Manheim, PA from 2:00 PM – 7:30 PM each day. TIME IS RUNNING OUT – Registration must be in place by tomorrow! Call us for more details.

Electrical Safety, Lockout Tagout Requirements & NFPA 70E. (December 4, 2006) This program is intended for maintenance personnel, safety and loss-control personnel, as well as managers and supervisors who may have employees that have exposure to electrical hazards in their workplace. The program runs from 8 to noon.

SPECIAL DEAL STILL GOING ON

We have boxes full of OSHA standards dated 2006. Since we are just around the corner from 2007, I am offering a year-end, close-out sale on these standards. Construction standards are normally \$35 – Available from now until the end of the year at \$10 each! General Industry standards are normally \$45 – Available now for just \$12. Shipping and taxes will be added to these prices. This is well BELOW our cost! Get them now while supplies last!

HOLIDAY GIFT IDEA

If you are looking to up-grade your AED to the new technology, contact us for information on pricing and available systems. If you are still working in a facility that isn't heart safe – Christmas is a great time to show your co-workers that you care and nothing says that better than an AED!
