

SAFETY / OSHA UPDATE

A Newsletter from High Safety Consulting Services, Ltd.

Information on Safety & Health in Your Workplace

JULY 2007 TRAINING UPDATE

It has been a good long while since I've had time to sit down and write a Safety Update. We have been extremely busy! This is great for business, but bad for newsletters! So... this is just going to be a quick update on the upcoming training sessions we are offering.

MONDAY MORNING MESSAGE

These sessions are held every third Monday of the month at our facility. These seminars are a great way to keep supervisors and others in your company informed of important safety issues. Join us for coffee and donuts! These sessions will be held from 8 AM to 9 AM in our Lancaster, PA office. Each session will be pack-filled with important information, interpretations and compliance tips. [Register online for any \(or all!\) of the topics below:](#)

- Safety Performance Management (July 16)
- Ergonomics: Making Work, Work! (August 20)
- Chemical Safety Requirements (September 17)
- Fall Protection Exposures (October 15)
- NFPA 70E & Electrical Safety Work Practices (November 19)
- Personal Protective Equipment Rules (December 17)

OSHA CONSTRUCTION INSTRUCTOR UPDATE COURSE (501)

We have an OSHA 501 Instructors' Update Class for Construction Instructors scheduled. This program will be held on August 22nd through the 24th at our location. For those of you that took the instructor program through us back in September of 2003, you are due for an instructors' update class. (Check your card). This program is for those that need to renew their authorization to teach the OSHA construction programs. You must have a course card that hasn't expired within the last 90 days. If you are further out than that, you must take the 500 course over again. This class is being coordinated through the KOSH Center. If you would like to register, contact us and we can take care of everything.

OSHA 30-HOUR COURSES

These classes are our most in-depth OSHA education programs. These programs provide attendees a comprehensive education on the OSHA rules and requirements.

[30-hour General Industry \(October 8 – 11\)](#): Topics such as bloodborne disease, machine guarding, safety program management, handling OSHA inspections, OSHA records and many other topics are covered in this program.

[30-hour Construction \(October 17, 18, 23, 24\)](#): This program is ideal for safety coordinators, project managers, site supervisors and safety committee members. This course will be held at the ABC facility in Manheim, PA.

ERGONOMICS

[Ergonomics: Making Work, Work! \(October 31\)](#): This program highlights the importance of good ergonomics in the workplace. We will review workstation design in manufacturing and office settings. We will review qualitative and quantitative tools that can be used for ergonomic assessments. Participants will have the opportunity to use the tools to conduct their own assessments. We will also review the status of OSHA enforcement and how to establish an ergonomics program in your organization.
